

Pre-Trial Intervention is a diversionary program in South Carolina designed for first-time offenders charged with non-violent offenses. It includes a prison tour, counseling, community service and programs specific to the criminal charge. Participants only have one shot at PTI anywhere in the state and must closely adhere to the program's requirements to be successful.

Upon completion, the charges against the participant will be dismissed and become eligible for expungement.

If the offender does not comply with the program's requirements, the case is subject to prosecution.
